Düşük Sürtümlü Asetal/Low Friction Acetal (LF)

Termoplastik grubundan olan bu malzeme düşük sürtünme katsayısı ve yüksek gerilme değerlerine sahiptir. Dönüşlü ve düz konveyör bantlarında kullanılan bu malzemenin gıdaya uygunluk belgesi bulunmaktadır.

This is a thermoplastic material with special additives providing low coefficients and high tensile strength. This material's specific components make it ideally suited for use in curved-route chains. Material with certificate FDA.

Asetal/Acetal(D)

Oldukça yüksek mekanik özelliklere sahiptir. İçerik olarak herhangi bir katkı maddesi bulunmamakla birlikte gıdaya uygunluk sertifikası bulunmaktadır.

This thermoplastic has extremely good mechanical properties. It is used without any special additives. Material with certificate FDA.

Güçlendirilmiş Polipropilen/Reinforced Polypropylene (PP+FV)

Cam elyaf katkılı polipropilendir. Kimyasallara karşı dayanımı yüksektir.

Fibre-glass reinforced polypropylene. This material is highly resistant to chemical agents.

Polyamid/Polyamide(PA6)

Yüksek gerilme özelliğine sahip olan bu malzemenin ses azaltıcı özelliği bulunmaktadır.

This material has high tenacity and good noise absorption polyamide.

Güçlendirilmiş Polyamid/Reinforced Polyamide

Cam elyaf katkılı olan bu malzemenin mekanik ve ısıl özellikleri artırılmıştır.

Polyamide variant with mechanical and thermal properties improved.

Alpolen®UHMW

Yüksek moleküler ağırlığa sahip olan alpolen düşük sürtünme katsayısı ile sürtünme profilleri ve zincir kızıkları elemanlarında kullanılmaktadır. Gıdaya uygunluk sertifikası bulunmaktadır.

The ultra high molecular weight alpolen is the material more used in friction applications in view of its piece-quality relation. It can be used in sliding guides and friction profiles.

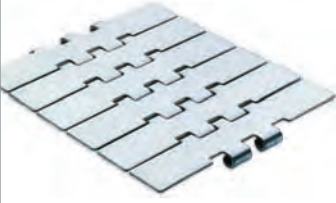

PBT

Normal şartlar altında su geçirgenliği neredeyse sıfır olan bu malzemenin mekanik ve ısıl özellikleri de oldukça yüksektir. Daha çok rulman yataklarında kullanılmaktadır.

It has high water absorption furthermore good mechanical and thermal properties.

Katalogtaki ürünlerin tasarımları değişikliğe uğrayabilir ve değişiklikten doğabilecek sorunlardan firmamız sorumlu değildir. In catalogue, our product's design will be changed and as a result of this we have no response.

Yukarıda belirtilen değerler firma tecrübesine dayalı olup garanti niteliği taşımamaktadır.

Malzemeler ve ürünler çalışma şartları doğrultusunda test edilerek uygun koşullar saptanmalıdır.

Ürünlerimizin Mekanik Analizleri SOLID WORKS Programında yapılmaktadır.

This information may be considered as a basis for recommendation, but not as a guarantee.

Materials and products should be tested under exact intended service conditions

to determine their suitability for a particular purpose.
